• LEADERSHIP ALIGNMENT UPDATE | ENSEMBLE HEALTH PARTNERS

Applied Practice Alignment Update

Foundations complete. Applied Practice expanded from one week to four — and the first of those four is now in hand.

Justin Schmidt · Integral Dragon

Where we are now

Phase 1 **Foundations** is complete. Phase 2 **Applied Practice** began as a single week — Week 3 of the ten-week program — and we expanded that single week into four so participants can do the work deliberately instead of sprint through it.

- → **Week 1 complete.** Participants established a project-health baseline and identified the highest-friction risks in their codebase.
- → **Three weeks remain** inside Applied Practice — focused on improvement, validation, and team adoption.

PHASE 1 · FOUNDATIONS COMPLETE

PHASE 2 · WEEK 1 OF 4 COMPLETE

What this phase is doing — and why we expanded it

Applied Practice shifts the emphasis from *tool familiarity* to *improving project health* in real codebases. The original one-week compression did not give participants room to inspect, improve, validate, and review deliberately. Four weeks gives each of those moves its own week — with evidence and a concrete output at the end of each.

WEEK 01

Inspect

Establish the project-health baseline. Identify the highest-friction areas.

WEEK 02

Improve

Aim AI at one bounded improvement. Stage a reviewable candidate change.

WEEK 03

Validate

Tests, observability, and security review — a change only counts when it's validated.

WEEK 04

Review & adopt

Compare results, decide w
define repeatable team pr

WHAT THE EXPANSION BUYS US

- Room to do the work, not just hear it explained.
- Evidence collected and reviewed each week, not rolled up at the end.
- Structural improvement we can measure — not self-reported "felt better."

THE GOAL THIS SERVES

- Systems that are easier to **understand**
- Systems that are safer to **change**
- Systems that are easier to **govern**
